Welcome

This site supports the development of coding standards for commonly used programming languages such as C, C++, Java, and Perl, and the Android™ platform. These standards are developed through a broad-based community effort by members of the software development and software security communities.

For more information about this project and to see tips on how to contribute, please see the Development Guidelines.

The SEI CERT C Coding Standard, 2016 Edition (errata)

The SEI CERT C++ Coding Standard, 2016 Edition (errata)

Standards Development Area

The following development areas enable you to learn about and contribute to secure coding standards for commonly used programming languages C, C++, Java, and Perl. Contact us to comment on existing items, submit recommendations, or request privileges to directly edit content on this site.
The Android robot is reproduced or modified from work created and shared by Google and used according to terms described in the Creative Commons 3.0 Attribution License. Android is a trademark of Google Inc.
The Secure Coding eNewsletter provides timely information about CERT secure coding standards.

The Summer 2018 Edition of the Secure Coding newsletter was published on 4 September 2018.

The Top 10 Secure Coding Practices provides some language-independent recommendations.

Visit the Secure Coding section of the SEI's Digital Library for the latest publications written by the Secure Coding team.

Learn more about CERT Secure Coding Courses and the Secure Coding Professional Certificate Program.
