Java

- SER00-J. Enable serialization compatibility during class evolution
- SER01-J. Do not deviate from the proper signatures of serialization methods
- SER02-J. Sign then seal objects before sending them outside a trust boundary
- SER03-J. Do not serialize unencrypted sensitive data
- SER05-J. Do not serialize instances of inner classes
- SER06-J. Make defensive copies of private mutable components during deserialization
- SER07-J. Do not use the default serialized form for classes with implementation-defined invariants
- SER08-J. Minimize privileges before deserializing from a privileged context
- SER09-J. Do not invoke overridable methods from the readObject() method
- SER10-J. Avoid memory and resource leaks during serialization
- SER11-J. Prevent overwriting of externalizable objects
